

SPIRALPACK
PAPER CORES

We pursue
innovation and
sustainability
in packaging

Moving Together

Spiralpack is a paper cores company and part of the industrial arm of Darvesh family.

Initially as a cardboard tubes producer, Spiralpack has grown, in production levels and experience, increasingly targeting industries of great demand: paper cores.

Spiralpack offers a range of products that take a key role in the production process of our customers, making us one of the largest producers of standard and high-performance paper cores of the Iberian Peninsula.

Spiralpack Iberian Peninsula

The European Branch History

Spiralpack, was bought by the Darvesh Group in 2013, the company has built a new factory, equipment and human resources reorganization.

Darvesh Group acquired Cicarsa Spain

2015

Spiralpack Portugal and Spain **+40 000 Ton/Potencial**

In the World

Spiralpack is global, with factories in:

Portugal Spain South Africa

The brand Spiralpack is global, with factories in Portugal, Spain and South Africa.

At 20km from the airport, Spiralpack Portugal is situated 30km north from Porto. And 2km from A3, highway that connects Porto to the north of Spain. Spiralpack is perfectly positioned to serve the market by land, ferry or sea.

Mission

We value proximity, providing support and advice, and adapting to customer needs. A multidisciplinary team makes use of new technologies, transforming each challenge into an effective solution.

By performing product development, our team designs and conducts industrial testing

to ensure that the product covers all of the customer's needs and pretensions.

Our know-how allows us to find solutions and is continually investing to be able to introduce new technologies in our processes as well as new products and increase our quality and service.

Future? We Care

Sustainability

We are a sustainable company, with an objective of growth based on the know-how and respect we have for ourselves and for the market. We remain focused on growing the business and expanding the range of products and the quality that characterizes us.

Our mission is to offer quality industrial products with a sublime service, always respecting the environment.

Our products are made from completely environmentally friendly materials and are recycled. This allows us, in the chain of use of our product, to recycle our customer and subsequently his clients, thus contributing to environmental sustainability.

Environment

Spiralpack cares about the environment and take measures to ensure the correct management of

the company, as these are aimed at minimizing the environmental impact of our activity.

The use of non-polluting materials, complying with all standards, allow the use of our products in contact with food.

Spiralpack has ongoing activities aimed at improving the health of our workers and their jobs, reducing risks and developing an Occupational Risk Prevention Management System.

Quality

Our main objective is to offer quality industrial products with exceptional service, ensuring the satisfaction of all our customers and helping to organize their business in a rational way. Quality guaranteed through our quality management system (UNE-EN-ISO 9001: 2000), implemented in December 2010.

Products

Paper Cores
Edge Protectors
Cores Pack

We offer a range of products that play a key role in the production process of our customers. Our name comes from the production of cardboard cores (Spiral) and Packaging solutions (Pack).

Paper Mill

We produce these high strength cores, which are used in the production of fine and specialty papers, recycled liner-board and paperboard, tissue and towel and other paper grades, that will later be processed into packaging.

Film

Spiralpack's high-performance film cores offers great stability, endurance and quality. These cores are designed for winding or unwinding films, foils and flexible packaging materials or other demanding products.

Tape & Labels

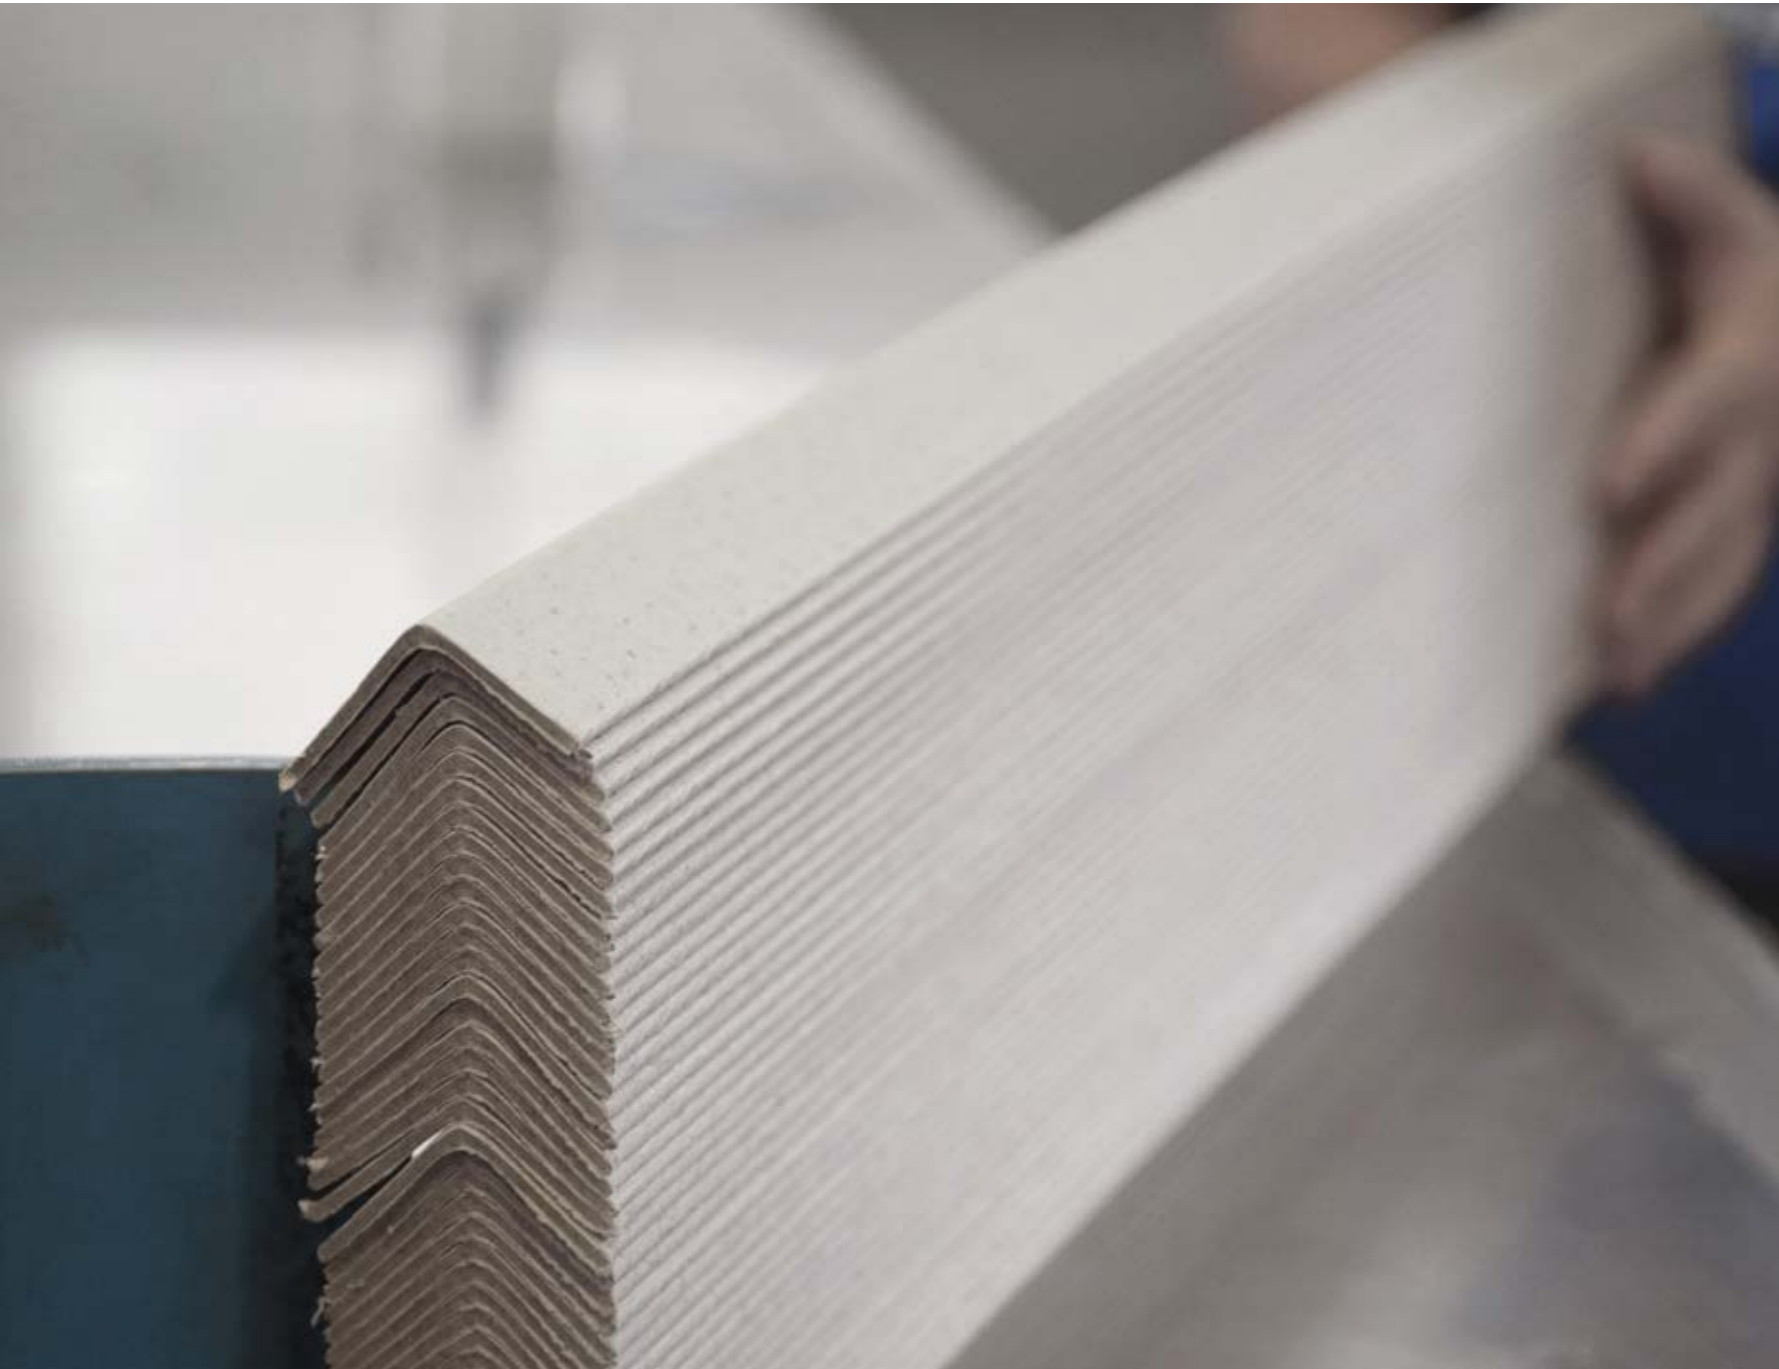

These cores are designed for demanding tape and label manufacturers. Spiralpack produces Tape & Labels Cores to the strictest standards in terms of dimension, strength characteristics and finish. We also offer personalization for additional visibility of your company logo.

Paper Cores

Textiles

Spiralpack manufacture custom-made tubes for use throughout the textile industry, making high quality tubes and cores for the production, storage, distribution and end-use of various types of yarns and fibres.

Edge Protectors

Spiralpack produces an extensive range of cardboard edge protectors for diverse use: support, packaging, protection and transport of your goods.

Due to the perfect angle and size, the profiles can be used manually and mechanically, providing protection to vulnerable corners and edges on pallets. They also provide protection of fragile materials, bobbins and support for cardboard boxes.

Length, wing width, color and thickness are customised to your needs. Personalisation with your company name or logo is also possible.

Benefits of Edge Protection:

- Reduces damage during transport;
- Improves pallet stacking stability;
- Cost effective by using less material;
- Optimal security;
- Fast and easy to apply.

Food

The first sense a customer uses when buying food is their sight, which makes packaging extremely important. It creates visual appeal and helps your products to stand out on crowded shelves. We are able to create attractive designs with our customers.

Retail

Whether it's a unique gift, a guilty pleasure, the urge to splurge or a basic necessity, each day we make many purchasing decisions, often in just a split second. The right packaging creates an emotional response that can sway those decisions. We are passionate about helping our customers create emotion. You design, we create. And together we succeed and persuade!

Mailing

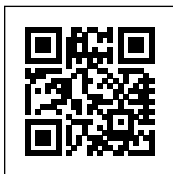

Aesthetically pleasing – bringing the unattainable within grasp—a feeling of instant opulence. With a closed circle, an open mind and our shared creativity, we can produce a winning message through packaging.
